UNDERSTANDING FINISHED/NON-FINISHED CABINET ENDS AND THE USE OF FILLERS

When the cabinet end is not finished, a filler must be used when placing the cabinet against a wall (minimum filler needed is 1"). When combining cabinets, adjoining cabinets do not require a finished end, however a 3-1/2" filler must be used - this adds 2" to the overall length of the ensemble and maintains the 2" recess design of the Premium Cabinet Collection.
