INCLUDES

- Stainless Steel Trench Grate
- Drain

SPECIFICATIONS:

Comfort Designs compression molded solid surface rectangular shower base. Code-compliant, seamless one-piece unit shall be of non-porous solid surface with glass particulate reinforcement. The floor shall slope to front center drain and include a linear trench that extends to both side walls to capture excess water with a maximum 3/4" entry threshold.

The trench drain area shall be a maximum of 5-1/8" wide and shall meet or exceed a 2.0 GPM water drainage capacity. The trench grate shall include a snap-in-place, removable 304-stainless steel grate with smooth bridges. Tiling flange will extend not more than 1" higher than the threshold, which provides an integral molded water barrier.

Floor surface to be a patterned, textured and slip-resistant design that meets ASTM F462 or does not interfere with the flow of water. Shall meet ANSI Z124-2011. Must meet ADA compliance for Roll-in showers. Shower floor shall be used with tile floor and installed as shown on plans.
