

Electronic Exposed Battery Urinal Flush Valve - Sloan®/Zurn® Retrofit

81T231BTA-30-19

Description

Electronic exposed battery flush valve for 0.75" (19 mm) top spud urinal fixture with quiet action chloramine-resistant diaphragm and fixed flush volume factory set to 0.5 gpf (1.9 Lpf). Fits Sloan®/Zurn® models.

Specification

- Flush Volume: Fixed, non-adjustable - factory set @ 0.5 gpf (1.9 Lpf)
- Fixture Type: Urinal with 0.75" (19 mm) top spud
- Valve Type: Urinal Flush Valve
- Operation: H₂Optics® sensing technology

Features

- Polished chrome-plated vandal resistant metal cover with top mounted sensor operated H₂Optics® electronics
- Right or left-hand supply installation
- ADA compliant, automatic operation battery powered infrared sensor
- Scratch resistant replaceable lens window
- Four (4) size AA alkaline batteries factory installed with valve in sleep mode for easy installation
- Hinged battery housing for easy maintenance
- Quiet action, TECK® exposed diaphragm flush valve
- Chloramine resistant diaphragm
- Renewable seat
- Polished chrome-plated finish for an attractive and corrosion-resistant appearance
- Maximum 13" (330 mm) from centerline of valve inlet to top of water closet
- Adjustable 4.75" ±0.5" (121 mm ±13 mm) inlet/valve outlet centers
- Vacuum breaker
- Cover tube, stainless steel wall flange, spud flange, spud nut, and 13" (330 mm) outlet tube
- Water conserving fixed, non-adjustable flush volume, factory set to 0.5 gpf (1.9 Lpf) for efficient water usage

Optional Accessories

- **061391A** - Copper Defense conversion kits with CuVerro Shield bactericidal copper alloys for 81T electronic flush valve button (**Available in Canada Only**)
- **061069A** - Hardwire converter & rigid connection assembly for 3rd Generation E-FV
- **060704A** - Transformer 20VA, 120/24Vac (for use with up to 5 units)
- **060771A** - Transformer 40VA, 120/24Vac (for use with up to 10 units)

Complies With

- ASSE 1037/ASME A112.1037/ CSA B125.37
- ICC / ANSI A117.1
- EPA WaterSense listed

(Contact Delta Representative for State and/or Local Approvals)

Operation

- Infrared sensor range adjustment of 8" - 24" (203 - 610 mm), factory set at 16" ±2" (406 mm ±51 mm)
- Low battery flashing light (5000 flushes remaining) with battery strength indicator
- Optional 24 hour automatic flush factory set to off
- Set-up sensor range adjustment indicator lights
- 6 VDC input, 6 second arming delay
- Electronic operated non-hold-open metal override button with 5 second lockout
- Recommended water supply:
Minimum flowing pressure – 25 psi (172 kPa)
Minimum flow rate – 8 gpm (30 L/min)

NOTICE Dimensions are for reference only, measurements may vary ± 0.25" (6 mm).
Maximum flow rates - 60 psi (414 kPa).

Electronic Exposed Battery
Urinal Flush Valve - Sloan®/Zurn® Retrofit
81T231BTA-30-19

Teck® flush valves are designed to operate at any supply pressure between 20 psi and 125 psi in accordance with ASSE 1037/ASME AI 12.1037/ CSA B125.37. The Teck® flush valve delivers the industry's highest peak flows to enhance bowl scrubbing. At high water pressures, splash out, noise or reduced life of plumbing components may be observed with a few models of water closet or urinal fixtures. To minimize or eliminate these effects, select a different model of water closet or urinal from the same or another manufacturer, or install a pressure reducing valve. If the installation does not allow for either of these options, the control stop adjusting screw may be used to reduce pressure to the valve.

NOTICE Dimensions are for reference only, measurements may vary $\pm 0.25"$ (6 mm).
Maximum flow rates - 60 psi (414 kPa).
