

This exploded view diagram illustrates the assembly of a door handle. The components are labeled as follows:

- 1**: The main handle body, which is a long, cylindrical tube with a textured grip surface on one end.
- 2**: A decorative cap or spacer ring that fits onto the handle body.
- 3**: The mounting plate, which is a rectangular plate that the handle body is attached to. It also shows the internal mounting hardware, including a screw and a washer.

The diagram shows the handle body (1) being inserted into the mounting plate (3) and secured with a screw. The decorative cap (2) is shown separately, indicating it is a separate step in the assembly process.
