Danger of scalding

Pressure fluctuations in the water supply lead to sudden and considerable water temperature fluctuations.

Avoid pressure fluctuations and limit hot water temperature.

Any scalds should be examined by a physician and treated, if necessary.

This exploded view diagram illustrates the components of a door handle assembly. The main parts include a large rectangular base plate with a circular cutout, a smaller rectangular plate with a circular hole, a cylindrical knob, and a rectangular lever. The assembly is secured with various screws and bolts, including a large bolt for the base plate, a smaller bolt for the lever, and several screws for the knob and lever. The diagram shows the relative positions of these components, indicating how they fit together.
