THE SPIRIT OF FRANKE

A hundred years. In terms of history, no more than the blink of an eye. In biological terms, more than a human lifespan. In science and technology, a succession of epoch-making discoveries: from quantum mechanics and antibiotics, to the computer revolution and the human genome. From a business angle, a new age with many opportunities and prospects opening up as never before. But also unexpected challenges and unpredictable risks.

Two world wars, economic crises, globalization and dwindling resources, the boom and bust of new ventures and markets, investors taking short-term profits instead of building long-term value, managers who rise and fall in rapid succession. From Franke's point of view, the beginnings of a stable and sustainable company history.

Many businesses never reach their first century. Franke has. Why? More skillful leadership? More dedicated employees, more loyal customers? Good luck? A mixture of all these? What part has Franke's corporate history played? Would a chronology of events reveal the formula for Franke's success? Or would the stories behind the history tell us what made Franke the company it is today?

We set out to answer these questions and came up with surprising answers and fascinating stories at every turn. Franke stories. Stories for and from entrepreneurs. Stories about relationships, setbacks and new beginnings, about enterprise, commitment and passion. Stories about people for people. Stories without an expiry date. Stories that have one thing in common: the spirit of Franke.

Have we aroused your curiosity? If so, we'd like to invite you to discover these stories and the special spirit of Franke for yourself. We hope you'll find them a source of inspiration: www.100yearsfranke.com
