Notes

Measure your actual product for rough-in details.

Install this product according to the installation instructions.

The hot water supply should be 70% of the capacity of the bath or greater. Installations will vary.

Provide one grounded electrical outlet within 24" (610 mm) of each component.

Pump must be relocated to custom position at the time of installation. Provide adequate clearance.

Rim-mount faucet installations: Before drilling the mounting holes, ensure the faucet does not interfere with the drain overflow and circulating system.

Deck-mount spout installations: Consult local and national codes for minimum air gap requirements.
