Notes

Measure your actual product for rough-in details.

Install this product according to the installation instructions.

The hot water supply should be 70% of the capacity of the bath or greater. Installations will vary.

Provide one grounded electrical outlet within 24" (610 mm) of each component.

Rim-mount faucet installations: Before drilling the mounting holes, ensure the faucet does not interfere with the drain overflow and circulating system.

Deck-mount spout installations: Consult local and national codes for minimum air gap requirements.

The apron (if used) must be installed before the finished floor and wall materials are installed.
