Notes

Install this product according to the installation guide.

WARNING: Risk of property damage. To properly secure the vanity, drilling into the floor is required. Ensure drilling into the floor will not damage obstacles beneath the floor, such as heating panels, mats, or cables.

Two 3/8" holes must be drilled 3/4" (19 mm) into the floor to properly secure the console table legs.

WARNING: Risk of property damage. Select 250 lbs (113.4 kg) load bearing lag bolts with a length that can safely clear any obstacles in the wall. Calculate the proper length of the lag bolts by adding the following: 1-1/2" (38 mm) bracing + wall board thickness + bracket thickness.
