EFFECTIVE JULY 15, 2010

 **MOEN**
Buy it for looks. Buy it for life.®

ABI953 / SI52 COMPLIANT FAUCETS

Bulk Pack Kitchen & Lavatory Faucets

We're pleased to bring you Moen's 2010 Bulk Pack catalog. As we did last year, we have included a section from pages 43-58 that outlines our faucets that are compliant with new legislation effective in California and Vermont.

While all of Moen faucets comply with the EPA's stringent lead safety standards, these states issued separate legislation which reduces the existing plumbing lead standard for faucets and plumbing fittings that convey drinking water to 0.25 percent.

The legislation went into effect on January 1, 2010. In an effort to make this an easier transition for our customers, Moen is pleased to include compliant versions of all of our existing products in this catalog.

All of Moen's ABI953/SI52-compliant bulk kitchen and bath faucets are featured in the blue section at the back of the catalog (pages 43-58) and are available for order and shipment today. Each compliant product is easily identified by the "CA" prefix before the SKU number.

Per the legislation, non-compliant products cannot be introduced into commerce in the states of California or Vermont after January 1, 2010.

We are encouraged by the direction in which this new compliance is leading us, and throughout this process, Moen is dedicated to providing an easy transition for you - our customers. And we will continue to ensure that every faucet that Moen produces undergoes the proven, rigorous testing and quality assurance that enables it to be called a Moen faucet.

For additional information on the ABI953/SI52 legislation and to view a full list of Moen's compliant faucets, please visit www.moen.com/legislation

MOEN® BULK-PACK™

Bulk-Pack gives you everything you need for on-site installation:
kitchen, lavatory, Roman tub, tub/shower faucets and stainless steel sinks in case lots.

Each kitchen and lavatory faucet carton contains individually packaged faucets ready for installation.

Roman tub and tub/shower faucets come packaged in two cartons. The rough-in valves are in one carton, the finish trim in another carton. This helps you avoid losing or damaging the trim.

Each carton is labeled for easy identification.

PARTNERING TO PROTECT THE ENVIRONMENT

From faucets that meet WaterSense® criteria to showerheads that contribute towards earning LEED® points, both without sacrificing performance, Moen is continually developing new products and innovations to conserve our planet's most precious natural resource.

WaterSense, a voluntary partnership program sponsored by the EPA, helps protect the United States' future water supply by promoting water efficiency. Look for the WaterSense logo to identify water-efficient faucets that meet criteria.

As of Jan. 1, 2009, all Moen lavatory faucet skus* will be manufactured with a 1.5 gpm aerator that is certified to meet WaterSense criteria. The packaging label will clearly indicate the WaterSense logo and the 1.5 gpm flow rate. If the product you receive does not have the qualifying label markings, a 1.5 gpm replacement aerator can be ordered by calling 1-800-BUY-MOEN.

*excluding all bathtub spouts and showerheads and some commercial faucets

The Green UPC symbol indicates that this product has been certified by the International Association of Plumbing and Mechanical Officials (IAPMO) to reduce water consumption by at least 20% when compared to standard flow rates.

Pressure-Balancing Shower Valves

We've all been there. The shower instantly becomes scalding hot or ice cold because someone turns on a washing machine or flushes a toilet. Not with Moen pressure-balancing valves. Our Moentrol® and Posi-Temp® valves help guard against this "shower shock."

M•PACT® System

Your style tastes may change. But your Moen faucet doesn't have to. Our revolutionary **M•PACT** common valve system allows you to completely upgrade the style of your lav or shower faucet without replacing any faucet plumbing.

LifeShine Finish

Use it every day. You'll never scrub or wear off the beauty of a LifeShine finish. It gives you the designer touch of polished brass with the durability of chrome, and is guaranteed not to tarnish, corrode or flake off...for life. LifeShine is available on all Moen Brushed Nickel, Classic Stainless and Polished Brass.

Limited Lifetime Warranty

It's durability assured. All Moen faucets come with a Limited Lifetime Warranty against leaks, drips and finish defects. For complete details, call 1-800-BUY-MOEN, see your Moen dealer or visit our web site at www.moen.com.

ABI953 / SI52 COMPLIANT FAUCETS

Bulk Pack Kitchen & Lavatory Faucets

For more information about the legislation visit www.moen.com/legislation

The faucets in this section meet legislation specifically enforced in the States of California and Vermont that went into effect on January 1, 2010. These states issued legislation which reduces the existing plumbing lead standard for faucets and plumbing fittings that convey drinking water to 0.25 percent. All other Moen faucets are already compliant with strict national lead standards.

For ease of use, this ABI953/SI52 section mirrors the same format used throughout the main body of the book.

Please note the following:

- Each ABI953/SI52 compliant faucet has the same model number as the non-compliant version, but with a "CA" prefix that must be included when ordering (ex: CA67570C).
- Only kitchen and lavatory sink faucets are affected by the legislation. If you need a coordinating shower or Roman tub faucet, you will need to reference the main body of the book.
- All skus are available for order and shipment.

For more information regarding Moen's compliant faucets, lead legislation and specific ship dates, please visit www.moen.com/legislation
