## PureFlow® Zero Lead PEX Crimp Eco Brass® Fittings

### Features

- Superior dezincification corrosion resistance compared to standard brass materials
- Complies with California AB 1953 and Vermont ACT 193 "Zero Lead" requirements for potable water applications.
- Most widely used plumbing connection system
- Proven Eco Brass® material used worldwide

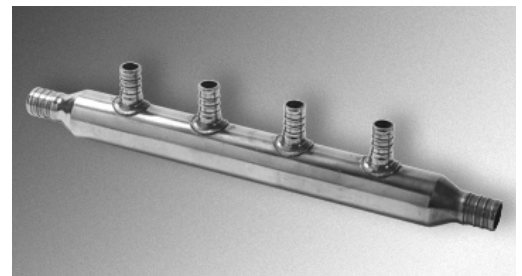

With California and Vermont adopting a "Zero Lead" requirement (per AB 1953 and ACT 193), Viega is now offering Eco Brass® PEX Crimp fittings for use with ViegaPEX™ and ViegaPEX Ultra PEX tubing.

"Zero Lead" identifies Viega products meeting the lead free requirements of California and Vermont law, effective January 1, 2010, as tested and listed against NSF - 61 Annex G.

When the product is marked with the cNSF®us pw - G designation it affirms compliance to California's and Vermont's Zero Lead requirement.

The Eco Brass material has superior dezincification properties as compared to standard brass crimp fittings and will carry the same trusted listings required for potable water use. Viega selects top quality materials such as Eco Brass, bronze, stainless steel, and durable plastics providing the basis for the very highest standards of quality that Viega is known for.

In addition to our zero lead fittings, Viega also offers a variety of accessories needed to complete your zero lead installation that includes the MANABLOC manifold parallel water distribution system, Polyalloy™ PEX Crimp fittings and a variety of copper PEX Crimp manifolds and Eco Brass valves.
