

Solid Surface Shower Bases

SMFSLB Low Profile Tub Replacement End Drain

FEATURES

- Solid material all the way through which is cast as a single piece.
- Aluminum Hydroxide (Bauxite) combined with pure acrylic polyester resin creates a homogenous material that is super dense and consistent throughout the base. This results in a product that is easy to repair, soft to the touch, and features gentle matte surfaces that will not support bacteria growth.
- Extremely low 2" curb height for a sleek, modern look. Once the underlayment and tile are installed, there is about a 1" effective curb height for easy entry and exits.
- A wide 3-1/2" threshold depth to hold the modern barn door style shower doors. Also includes an integral 1" high tiling flange for a waterproof installation.
- Unique curving drain cover, in the same material as the base, conceals a shower drain and eliminates the need for decorative drain covers to match faucetry. Drain not included.
- 8.5" Drain center location provides a direct replacement for an existing bathtub. Simple installation to convert a bathtub to a 60" shower.
- 10 Year Limited Residential Warranty / 3 Year Commercial Warranty
