

1. General Description

- a. Wood slats fitted to a stainless steel frame, with adjustable-height legs
- b. Model with full seat
- c. Seat is hinged to allow user to fold down for use or fold up for clearance

2. Item Code and Description

- a. 04030 . . . Wood slatted seat

3. Physical Characteristics

- a. For detailed drawings see next page
- b. Stainless steel frame
- c. Wood slats made of eco-friendly rubber wood
 - i. Rubberwood is used to make the top of the wood slatted shower seat. It is a tree grown on plantations in Southeast Asia. The trees produce latex, which is used to make many rubber-based products. After a rubberwood tree ages more than 25 years or so its yield of latex diminishes to a point where it is no longer useful for that purpose. These trees are harvested and replaced with new rubberwood trees. Because it is a dense wood that is easy to kiln dry, shrinks very little and remains stable once dried, and offers great durability, rubberwood is used in a variety of kitchen, bathroom, and furniture goods. Since it serves these dual purposes—latex production followed by useful lumber—with little waste, rubberwood is considered an eco-friendly material.
- d. Legs adjust in 3/4" increments
- e. Foot on one leg includes a 1" range of fine-height adjustment
- f. Plastic feet protect floor and prevent slippage
- b. Installer must fasten mounting bracket to solid, structural blocking
- c. Mounting hardware not included; 1/4"-dia. stainless steel fasteners recommended

4. Performance Characteristics

- a. Nearly 10" range of height adjustment
- b. Hinged seat swings past 90° to remain in folded, upright position
- c. Seat supports up to 560 lbs. when properly installed
- d. Clean and disinfect all surfaces regularly

5. Other Information

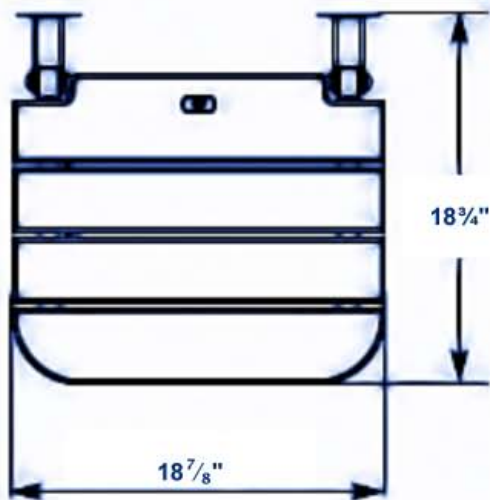

- a. 5 year limited warranty when installed in commercial settings
- b. 10 year limited warranty when installed in residential settings
- c. See AKW warranty for details
