Installation Steps

Step 1: Make level
Make sure the shower tray and bottom strip 100%
level, and make sure the wall jamb 100%
plumbing.

Step 2: Mark holes positions'
Mark holes' positions on the wall and shower tray through the pre-drilled holes on wall jamb and bottom strip. (Make sure no pipes or wire under where to be drilled).

Step 3: Drill holesDrill holes onto where marked at last step and put in wall plugs.

Step 5: Fit on glass panelInsert the fixed panel into the wall jamb and the bottom strip.

Step 7: Put on magnetic sealWhen this fixed panel using with a pivot door, the magnetic seal need to be fit on the edge of the panel. Please make sure the magnetic seal on fixed panel fit

the one on the pivot door.

Step 4: Fix frameFixed wall jamb to wall and the bottom strip to the shower tray or bottom base.

Step 6: Insert wedge gasket Insert the wedge gasket into the gap between glass panel and wall jamb, glass panel and bottom strip.

Step 8: Apply silicone

Apply silicone between wall and wall jamb, shower tray (or bottom base) between bottom strip outside only.

Do not use the shower panel within 24 hours!
