info@arcfirst.net

4. Performance Characteristics

- a. Select the kit that best meets the needs of an installer and/or an installation
- b. Premium kit includes convenience items that an installer may not have on hand
- c. Pro kit is for installation of a Tuff Form base only (not the shower walls or surrounding floor)
- d. Waterproofing compound, joint reinforcement tape, drain gasket, supply gasket, and drain connector are also available individually if more material is required for a project
- e. Depending on the size and complexity of a project, installers may need more materials to complete walls, a shower bench, niches, surrounding floor, or to make a wet room
- a. Consult Specification and Submittal Forms for information about the following individual items:
drain assembly for tile, waterproofing compound, joint reinforcement tape and gaskets, drain connector
Kit contents are sufficient to install a Tuff Form shower base

5. Other Information

- a. Compliance certification:
 - a. ICC-ES PMG 1222
 - b. ICC-ES PMG 1248
